

## Jaguar Mk 2

Never was a sow's ear transformed more successfully into a silk purse. The transformed small Jaguar must rank near the top of any motoring beauty parade. Mark you, you must still stoop to see through the windscreen, and, if you sit in the back, your knees will be pressed into the front seat, but the back of your head will be grateful for that thick padded roll above the rear window frame. The acres of wood surrounding the door openings compensate for the loss of wood on the slender chromed window surrounds, and the switches were laid out with elegant symmetry.
