

Jeep - Chrysler Cherokee Chief

Another friend, a potter then preserver of industrial heritage, bought one of these. His Range Rover had been stolen and, as his weekend lair was in 50 acres of conserved ancient woodland fwd was essential. A combination of unhappy reliability issues with the Rangie and intelligent financing led him to Chrysler. Unlike some newer bloated 4-wd models the Cherokee had a well-balanced purposeful look about it and is a car you can actually use off-road, not to mention all the toys you could want. It has only one fault. As a rear seat passenger my head rested on the roof lining.
